36" Gate Kit (adjustable up to 50" wide)		HG07518	
42" Gate Kit (adjustable up to 50" wide)		HG07520	

Prior to construction, check with your local regulatory agency for special code requirements in your area. Common railing height is 36" or 42". Never span posts more than 8' on center for picket railing systems and 6' on center for glass railing systems. Always ensure there is proper blocking under each post as per installation instructions. Read installation instructions and view installation videos to get a complete understanding of how the Harmony Railing™ products assemble.

Written installation instructions and videos can be found online at www.harmonyrailing.com.

HELPFUL ORDERING INFORMATION:

1. Picket section kits include attachment clips and screws. If panels are cut and two pieces are used for installation, a separate attachment kit must be purchased.
3. Anchors and fasteners to secure posts to concrete or wood are **NOT INCLUDED** in kits.
4. Maximum post spacing on deck for picket railing is 8' on center and glass railing is 6' on center.
5. If using 1/4" tempered glass panel kit, glass panels must be purchased separately from a local glass company.

IMPORTANT NOTES:

- Actual picket panel sizes: 6' Panels = 69.43"; 8' Panels = 91.31".
- 3" posts are required to reach 6' & 8' lengths.
- MAXIMUM POST SPANS ON STAIR RAILING APPLICATIONS IS 70" ON CENTER.
- Stair railing panels are shipped at a 37° angle. Panels are adjustable and will accommodate 30-40° stair angles.
CAUTION: Over adjusting stair panels will cause loose and rattling pickets.
- 45° deck angles require 22.5° clips applied to each side of the post. The 22.5° clip kit is sold **SEPARATELY**.
- Using 2 Posts at top of stairs is recommended if compound angle cut is required.
